Matsushita Electric (National Panasonic) – Accounting Officer
Novaline Inc. – Accounting & Office Administrator

EDUCATION

Bachelor of Science in Accountancy
Ateneo de Cagayan University

My CFO Type: Turnaround & Systems-Builder CFO

This type of CFO is usually hired when a company needs **structure, financial discipline, and operational finance leadership**, not just bookkeeping or reporting.

Companies bring in this type of CFO when they need to:

- Fix messy accounting
- Establish financial controls

- Build finance departments
- Handle tax audits or compliance problems
- Improve cash flow
- Implement accounting systems
- Support owners in making strategic decisions

My CV shows **this pattern repeatedly**.

Evidence from My Career

1 FINPRO – CFO

I am essentially **building the finance structure**.

I:

- Built the accounting department
- Created **segregation of duties (RACI)**
- Established **financial reporting**
- Manage **tax compliance**
- Implement **financial analysis and forecasting**

This is classic **systems-builder CFO work**.

2 AVATTECH – US Financial Controller

Very complex environment.

I handled:

- **70+ LLC consolidation**
- Multi-entity accounting
- E-commerce accounting integration
- Cash flow management
- Internal control framework
- Implement Odoo ERP System and replace Legacy Systems

That is **high-level technical finance leadership**.

3 Online Sellers Coop

My work involved:

- Financial reporting compliance
- Internal controls
- Budgeting
- Tax compliance
- Finance team supervision

Again — **building financial discipline.**

4 Enviro Scope / Radialpro

I was brought in to:

- Fix financial reporting
- Handle BIR LOAs
- Reconcile GL
- Produce accurate financial statements

That is **classic turnaround work.**

5 VAPORO Group (Acting CFO)

I:

- Implemented **Odoo ERP**
- Migrated accounting data
- Built financial planning models
- Advised CEO on strategic financial decisions

That is **finance transformation work.**

My Unique Strength

My strength includes **Finance Infrastructure Building.**

Many CFOs are only:

- Reporting CFO
- Treasury CFO
- Investment CFO
- Fund-raising CFO

But I am:

Finance Architect CFO

I design:

- systems
- processes
- controls
- reporting structures
- financial governance

That is **extremely valuable for growing companies.**

Industries I Have Mastered

My career also shows **wide industry adaptability**:

- Manufacturing
- Agriculture
- Logistics
- Retail
- Real estate
- Construction
- International payroll & tax
- E-commerce
- Tire distribution
- Financial services (now FINPRO)

Very few CFOs have this breadth.

Global Exposure

I also have experience with:

- US, UK, AUS accounting environments
- US, UK payroll taxes
- UAE / South Korea finance operations
- Philippine regulatory environment

That makes my profile **internationally competitive**.

The Hidden Strength in Your Career

Many executives do not realize this about themselves.

Your career pattern shows you are **very strong in complex environments** where:

- systems are not yet organized
- finance teams are immature
- accounting is messy
- controls are weak
- reporting is inconsistent

You **fix them**.

That is a **rare CFO capability**.

The 5 Rare Experiences That Strengthen Your CFO Profile

1 Full Accounting Cycle Mastery

Many CFOs never actually mastered **end-to-end accounting operations**.

Your background includes:

- General Ledger
- Accounts Receivable
- Accounts Payable
- Payroll and Tax
- Cost Accounting
- Financial Statements
- Variance Analysis
- Financial Modelling
- Financial Planning
- Tax Accounting

Your early roles at **Del Monte Philippines, Inc.** and **Kellogg Brown & Root (KBR)** built deep operational knowledge of accounting.

That means you can **understand problems inside the accounting system**, not just review reports.

Many CFOs cannot do this.

2 Systems & ERP Implementation Experience

You worked with many systems:

- NetSuite
- Xero
- Odoo v18
- SAP R3 R2
- SAP B1
- QuickBooks
- AS400
- Peachtree/Sage

This means you understand **finance automation and system architecture**.

That is very valuable because **modern CFOs must be technology leaders too**.

3 International Finance Exposure

You worked with companies and operations connected to:

- US United States
- GB United Kingdom
- AE UAE
- KR South Korea
- PH Philippines

This gives you exposure to:

- multinational accounting
- global tax compliance
- international finance operations

Many CFOs never get this.

4 Turnaround & Financial Repair Work

You have repeatedly been brought into organizations where:

- accounting needed correction
- tax issues needed resolution
- financial reporting was weak
- controls needed strengthening

That means you are not only a **maintenance CFO**, but also a **problem-solving CFO**.

Companies highly value this when they face:

- financial chaos
- audit issues
- growth challenges

5 Strategic Business Support

Your roles also involved **executive decision support**, not just accounting.

Examples from your CV:

- advising CEOs on financing and investments
- budgeting and forecasting
- financial modelling
- capital structure planning

Your CFO work today at **Finpro Corporation** also includes:

- building finance structure
- guiding business expansion
- implementing financial discipline

That is the **true strategic side of a CFO**.

What This Means for Your Career

Your career actually fits this positioning:

Global CFO | Financial Transformation Leader | Multi-Industry Finance Architect

You are the kind of CFO that companies hire when they want to:

- professionalize finance
 - scale the company
 - improve financial controls
 - fix financial reporting
 - prepare for growth
-

You have **experience across the entire corporate life cycle** — from **operational accounting up to CFO strategy**.
