

I have worked for several companies in the past, bearing a position in an accounting environment and my experience for several years has exposed me to various facets of accounting from Accounts receivable, Accounts Payables, General Ledger, Financial Reporting and Analysis.

I am also confident that my exposure to a shared services or a BPO type of set-up will benefit the company by leveraging and applying the best practices I have gained from my previous employment such as leading and delivering continuous improvement initiatives to make the process more robust and effective. Leading effective process migrations thru establishment of transition plans and roadmaps to ensure smooth turnover of processes and creation of process documentations to ensure processes are well documented and readily available for use.

I look forward to hearing from you and learning more about the company and how I might contribute to its continued success.

Regards,

Catherine Calisin, CPA, CIMA Dip Ma
