Who am I?

*I am **Nonie Tiama Febrer**, sixth of a seven children of Igmedio Febrer and Carmelita Tiama, a farmer and a housewife who cooked a kakanin and sell it to the village to support our living. I was born in a simple village of San Lorenzo, town of Santa Elena, province of Camarines Norte, Bicol Region in Luzon, Philippines. I spent my childhood in this small village and attended my primary school at M. Hebrado Elementary School. My parents want me to have a much better quality of education, so they sent me to Gumaca, Quezon to finish my secondary school at Gumaca National High School. At 16, I started working as a helper in a grocery store in Bocaue, Bulacan, at 17 I worked as a factory worker in a garment factory in Mariveles, Bataan to support my university education. At 24 I finished my bachelor's degree through my perseverance and got my first professional job. And the rest is history; from ordinary accounting staff I become Finance Manager and CFO of different local and international companies.*

My achievements

I can say that from simple farmer son to a career professional individual is my basic achievement in life, I shared my blessing to my friends, immediate family and help others even in a little way.

***The Acts Kids** is my greatest achievement in life, from 2012 until now, The Acts kids helped a lot of children from different villages. I inspired some of them to focus and study well, not just those kids but also other people like me to do the same in the community.*

***The Acts Kids** is a self-relying foundation that supports the beginners to have their school supplies, we do it every opening of school year. We are also trying to give some of recipients who are already in the middle grade so they will inspire them to study well.*

I am very hopeful that this foundation may take long but if not, at least I inspired people to do the same by having a helping hand and to share the blessing with those fortunate and unfortunate children.

*I always say and believe that **"I learn to give not because I have much, but because I know exactly how it feels to have nothing."***

What can I offer?

I can offer myself, my dedication, perseverance and commitment to help the company achieve their mission and vision. I am always willing to learn something new most specially now a days where in technology advancement is very useful. I am looking for a new challenge that will give me new opportunities to spread my head in other areas of expertise coz I feel that my experiences are redundant already. I believe that right company or people will give me this opportunity at the right time.
